

THE ALIEES

Introduction to the Whitepaper

A Message to the OKRA Community

Before you read another page, we want to answer the most important question many members of our community are likely asking.

Why The Aliees?

After all, we've spent years building the OKRA community. Why introduce another token?

The answer is simple.

The Aliees is not replacing OKRA. The Aliees is part of the OKRA vision.

Two projects, one ecosystem

From the beginning, the goal was never a single cryptocurrency. It was an ecosystem. One token alone could not represent every part of it.

	OKRA	THE ALIEES
Role	Utility layer of the ecosystem	The world that introduces people to it
Function	Provides utility	Creates discovery
In the ecosystem	Helps power it	Helps introduce people to it
Position	The foundation	The invitation

The ecosystem brings together gaming, entertainment, storytelling, digital ownership, merchandise, collectibles, creators, businesses, and blockchain, working together to create something bigger than any one project could accomplish on its own.

A brand built to be discovered

People don't discover worlds because of the technology behind them. They discover them through what they can see, play, and share.

WHAT DRAWS PEOPLE IN	THE ALIEES TOUCHPOINT
Unforgettable characters	Collect a character

WHAT DRAWS PEOPLE IN	THE ALIEES TOUCHPOINT
Compelling stories	Discover an Aliees animation
Amazing games	Play one of our games
Communities to belong to	Become part of our community
Experiences to share	Wear our merchandise

Each of these is also an entry point. When someone discovers, collects, plays, wears, or joins, they are also discovering the larger ecosystem that OKRA helps support.

Why The Aliees exists

That relationship is intentional. It is why The Aliees exists.

TERM	DETAIL
Allocation	20% of revenue generated through The Aliees
Revenue sources	Character ownership, merchandise, licensing, games, digital products, and future Aliees revenue sources
Use of funds	Purchasing OKRA and/or adding liquidity to the OKRA ecosystem
Milestone cap	\$10 million cumulative
Status	Planned allocation, not a promise about market performance

20% of Aliees revenue allocated toward OKRA, up to a **\$10M** cumulative milestone.

As The Aliees grows, part of that growth contributes to strengthening the broader ecosystem during its early stages. It is a commitment to how revenue is allocated while building continues, not a promise about price.

Welcome to the next chapter

Great ecosystems aren't built by asking one project to do everything. They are built by creating multiple projects that each serve a unique purpose while supporting the same long-term vision. Together they tell a much bigger story than either could tell alone.

The pages that follow explain how The Aliees is being built, why it matters, and how it can help expand the reach of the entire ecosystem for years to come.
